

Serenity[™] seat cushion system

with Bolsa[®] coil technology

Shown with patent-pending
CoilMax[™] Technology

Serenity[™] Seat Cushion System is sold only as a coil unit. A foam enclosure will need to be provided **by the furniture manufacturer** in order to complete the seat cushion.

The best bedding comfort technology, now in a seat cushion.

Serenity[™] features the same coil technology as the Softlux[™] Seat Foundation System, utilizing fabric-encased coils in seat cushions for higher levels of comfort and support. Each coil flexes independently and adjusts instantly to optimize body contouring and support.

Dramatically less breakdown when compared to coils alone

When compared to foam:*

- Up to 21% less seat cushion breakdown with fabric-encased coil seat cushions over the life of the product.
- 16% less seat cushion breakdown with fabric-encased coils during typical warranty periods.
